Dear Parents and Carers

**Measles, Chicken Pox and Shingles**

Please may we ask for your cooperation in an important matter?

Sometimes students are receiving medical treatment which puts them at risk if they are exposed to measles, chicken pox or shingles.

The best way to protect students from measles is for all students at School to be immunised against measles. If you wish for your son/daughter to be immunised please contact your GP if your son/daughter has not already received it. If your son/daughter is suspected of having measles, you should let us know immediately.

Students undergoing treatment and pregnant staff are also at risk from chicken pox. If your son/daughter is suspected of having chicken pox you should let us know immediately.

It is also important that you let us know if there is anyone with/suffering from shingles at home.

Yours sincerely

Ms E Hickey
Welfare and Administrative Assistant
